Summary

Machine learning and data science practitioner with experience in computer vision, NLP, recommender systems, and foundation-model workflows. Background spans consulting, technical instruction, and product work with emphasis on model evaluation, data quality, reproducibility, and applied ML systems.

Relevant Experience

Upskilled Consulting | *Manager/Principal Consultant* | March 2024 – Present

Use photogrammetry, novel scene synthesis (i.e., 3D Gaussian Splatting) and other techniques to produce 3D models from photos and video; train/fine-tune models using proprietary remote sensing imagery; published peer-reviewed paper in the Proceedings of the 24th Python in Science Conference (SciPy 2025): Performing Object Detection on Drone Orthomosaics with Meta's Segment Anything Model (SAM) <https://doi.org/10.25080/uhje9464>

Flatiron School | *Lead/Senior Data Science Instructor* | June 2022 – September 2023

Taught the first Deloitte AI Academy cohort in the U.S.; earned a customer satisfaction score of 93.3%; designed a month-long curriculum module focused on performing ML using AWS; helped students develop basic Python data manipulation skills and learn how to apply transfer learning to Computer Vision and NLP tasks; Co-designed a week-long (40-hr.) data analytics curriculum for the Transatlantic Reinsurance Company (TransRe); taught the curriculum to a live cohort in NYC; earned a customer satisfaction score of 100%

MOPO Life | *Product Data Scientist/Full-Stack Engineer* | August 2020 – June 2021

Helped a social media startup work past the Cold Start problem; managed two capstone teams of SFSU grad students working to produce solutions to key Computer Vision- and NLP-oriented business problems; worked cross-collaboratively with the API and DevOps teams to merge features into production codebase; crafted logic for their hybrid recommender system (RecSys)

UC Berkeley Extension | *Teaching Assistant/Tutor* | February 2020 – December 2020

Co-lectured to Data Analytics and Visualization Bootcamp students on topics ranging from machine learning to creating interactive data visualizations using D3.js; taught and/or tutored 100+ students, remotely and in-person

Education

UC Berkeley Extension | *Professional Certificate, Data Analytics and Visualization* | 2019

Portland State University | *Bachelor of Science, Business Administration (Real Estate Finance)* | *Bachelor of Science, Community Development (Double Major)* | 2013 – 2015
